meticulous construction, Yamaha outboards are manufactured to provide you with years of enjoyment. However, they live in one of the harshest environments imaginable. High load, high-RPM operation, extreme temperatures and humidity, saltwater, sun, even long periods of non-use can all exact a heavy toll. And it's not just Yamaha outboards.

The service intervals were developed based upon "typical" use that includes operating at varied speeds, sufficient time for the engine warm up and cool down, medium to light loads and average cruising speed near 3000 ~ 4000 rpm range. As with any engine, if the customer's normal operating conditions are different more frequent service should be
